# TNS R

Q

2G/3G & LTE

S ... **-** LTE and GSM mobile network connectivity

R ... **-** Scan, detect, disconnect and connect subscribers to preferred networks

F ... **-** Multiple selection criteria available. Apply different parameters to different partners

S ... Segment subscribers based on plans

R ... **-** Audit logs, Alert logs and Message reports available through the Roaming Control portal

C ... **-** This fully-managed service combines the reliability of geographic redundancy with round the clock monitoring and support

P ... **-**When subscribers return to your serving area, reconnect them immediately to your network

S ... Improve subscriber satisfaction while limiting billing disputes and refund requests for unintentional roaming

D ... **-** ... Detect and evade anti-steering attempts by partner networks

O ... By controlling which network your subscriber connects to, you can control and reduce wholesale roaming costs and increase your negotiating power

L ... **-** Select the serve network based on business factors, not first to register

E ... **TNS** ...
